(a) Validation loss
(b) One-step field error
(c) Rollout admissibility
matched recall of real births
rollout nucleation ratio
unconditioned baselines' range
validation loss (relative $L^2$)
one-step relative $L^2$ of $\phi$
eikonal error $|\langle|\nabla\phi|\rangle - 1|$
baseline (incl. thermophysical conditioning)
other loss / architecture changes
wall-band L2 upweighting
phase-indicator term (all variants)
axial transformer
U-Net
